Larry, one more question about Tampa. What is the sloping of the playing field? That is, what are the values of $d_L$ and $d_W$? (assuming the field is sloping down to outward)

Takeo.
8' x 16'

L = 220 yds  ———> 660 ft

W = 150 yds  ———> 450 ft

Ratio 1:20

34 ft x 32 ft

Curb Height ~ 60 ft
